IT-manager
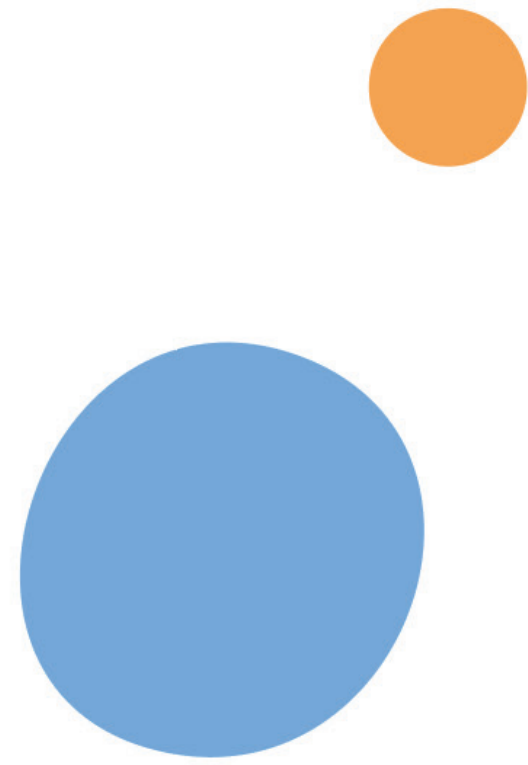

Creating software is expensive
and time consuming

No-code Swiss

It's 2023 and it's still a pain to

- Make software accessible to everyone

- Create software for affordable pricing

- Create solutions that precisely fit business needs

- Scale up for small companies

- Find experienced developers

No-code Swiss

What are people doing now?

- Register data by hand and risk losing it

- Use time consuming non suitable SaaS

- Hire developers that don't understand the clients needs

- Spend a lot of time and money developing the wrong solution
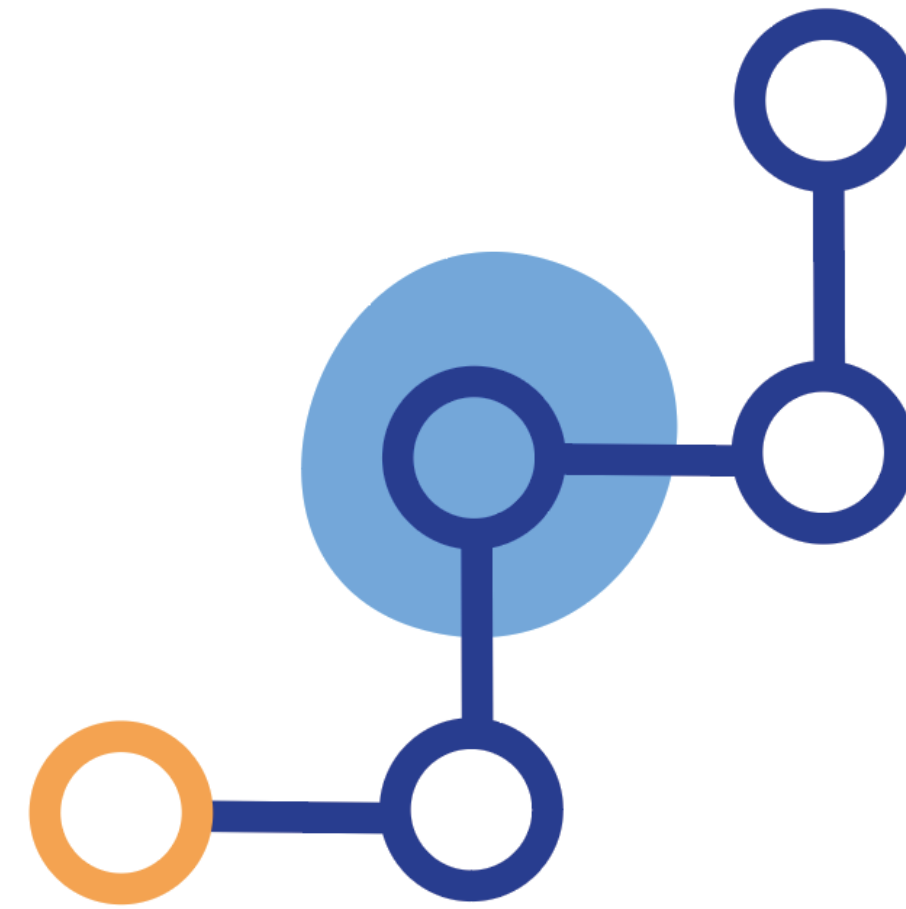

No-code Swiss

In a perfect world ...

You create the software you really need by yourself and never worry about losing data or wasting time *.

* The only resource you cant replenisch
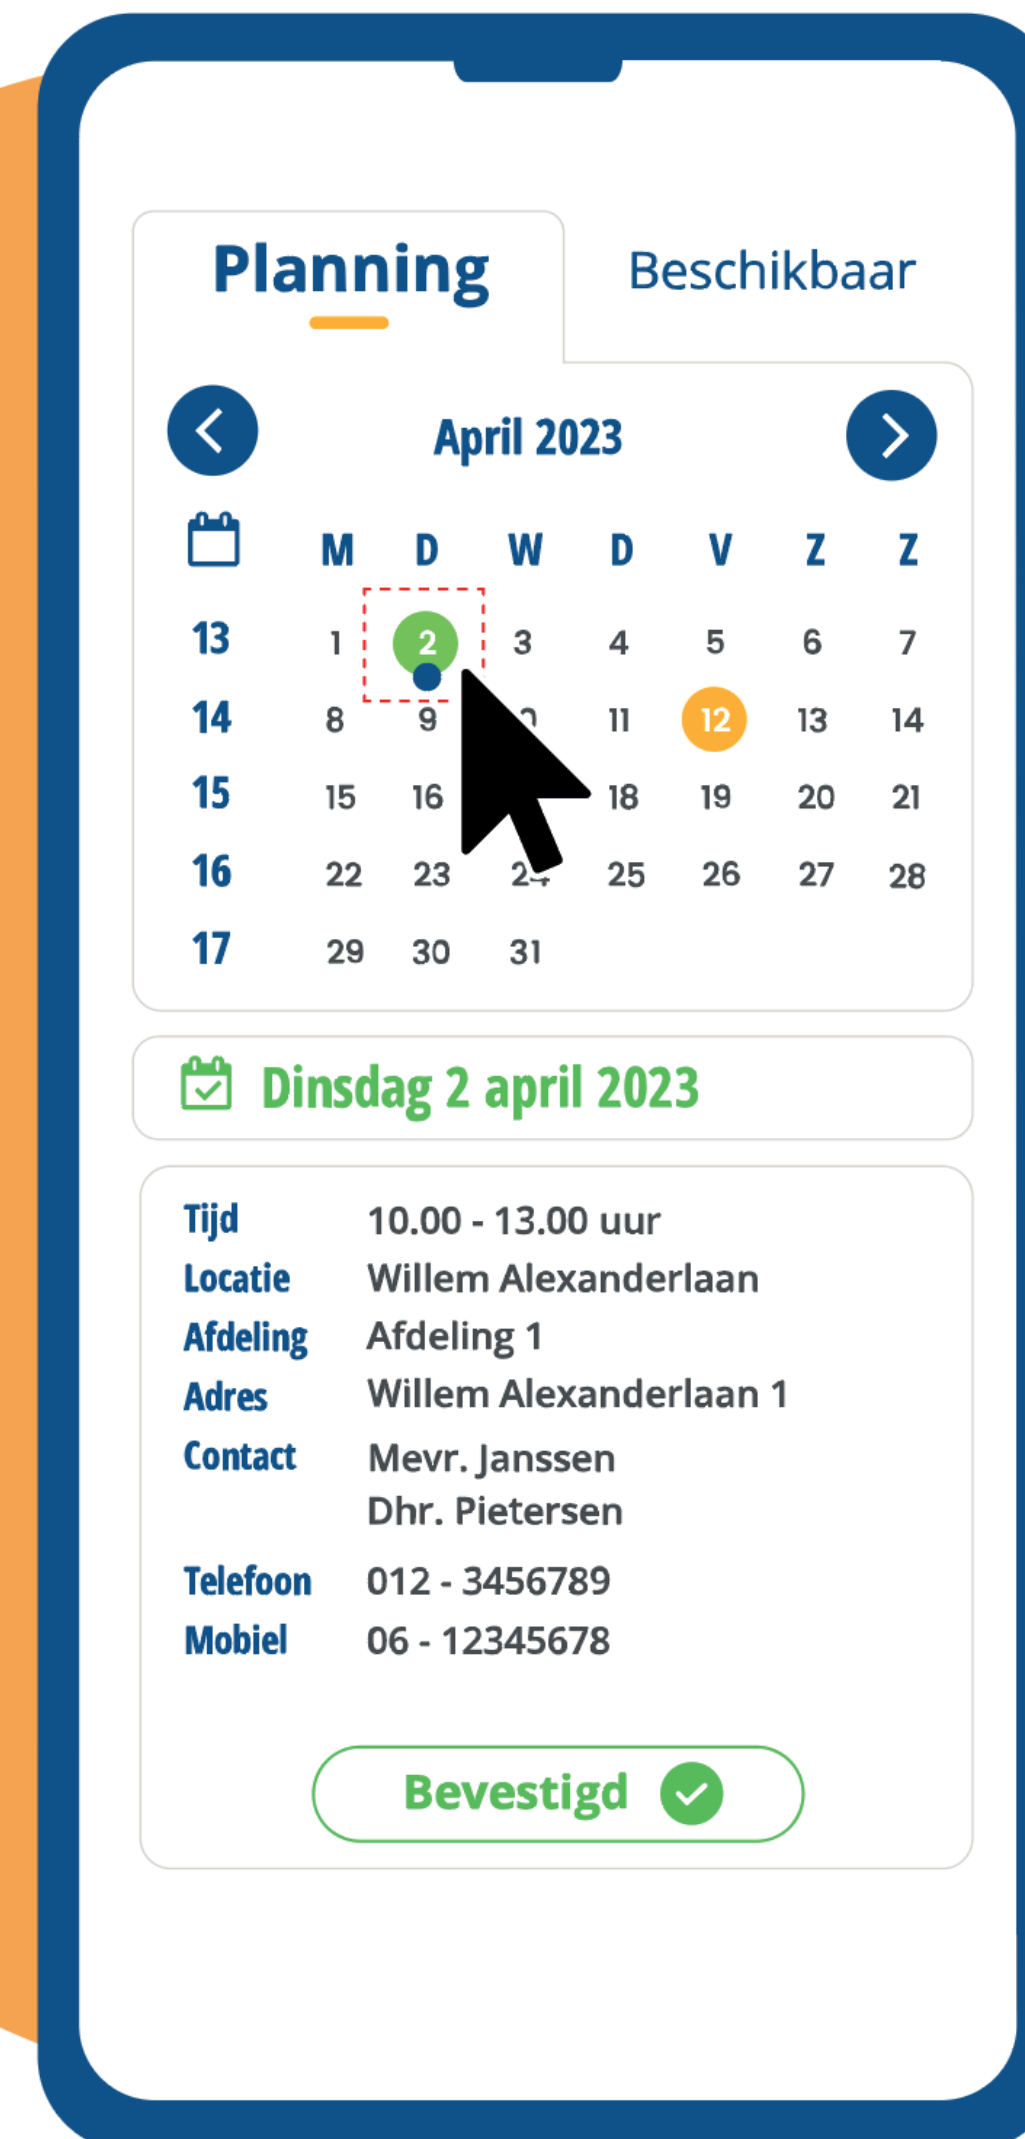

No-code Swiss

DataSol Swiss

Makes it possible for citizen developers to create the software they really need at this moment and in the (near) future to scale up their business

Uses a visual editor. You can actually see what you are creating.
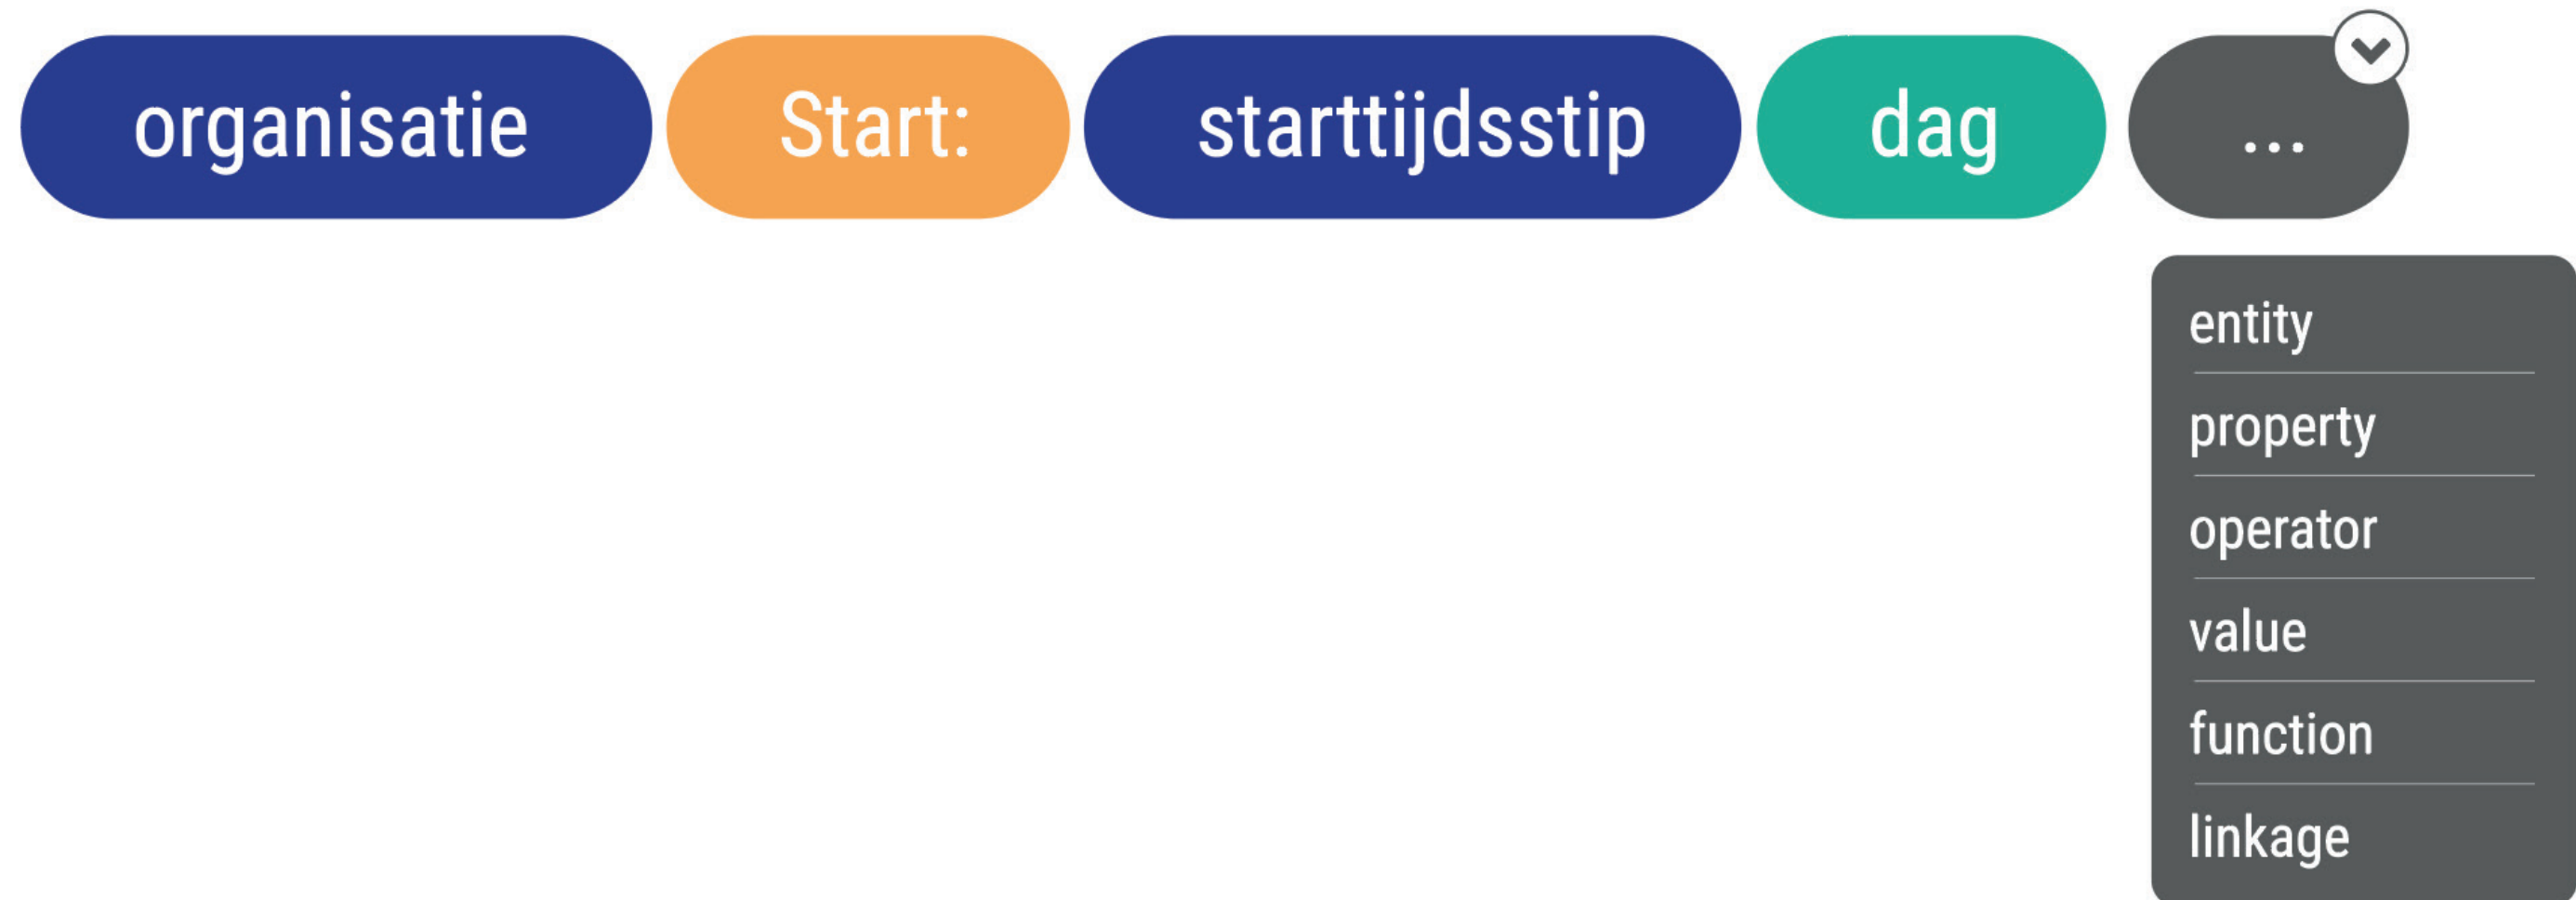

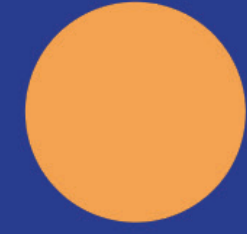

Simplicity matters.

No-code Swiss

You can visually create actions you need in the expressionmaker.

Creates 1 software solution for desktop, iOS and android

No-code Swiss

Why now?

- Developers are scarce

- A company cannot survive without the right software
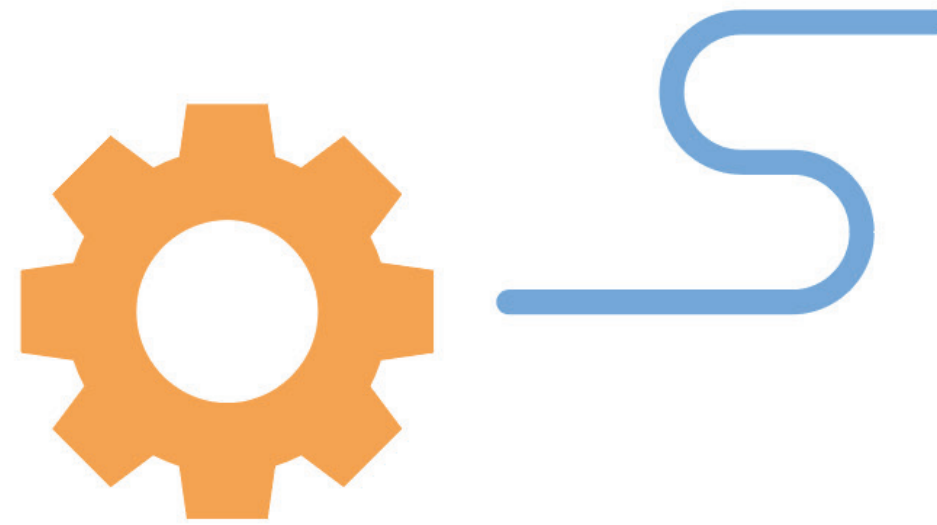

- People are used to operating digital things themselves

What did the competition screw up?

- Making it to exclusive

- Think they know better than
  the people doing the actual work

- Making development to time consuming

Business model

- Users pay an annual license fee
- Paid workshops
- Partner program with contribution per client
